

ERIC YU

+1 778-838-4666 | ericyu112807@gmail.com | github.com/ericyu1128 | freezed.xyz | Toronto, ON

EDUCATION

York University

Sep 2025 – Apr 2029

Bachelor of Arts in Statistics (Second Year)

Toronto, ON

- **Relevant Coursework:** Statistical Modeling, Probability Distributions, Data Processing & Hygiene, Applied Mathematical Computing.

TECHNICAL PROJECTS

Freezed (freezed.xyz) — Data-Driven Recommendation Platform

GitHub: github.com/ericyu1128/Freezed

- Developed an interactive web platform matching winter sports equipment to user body metrics and riding preferences through automated matching algorithms.
- Engineered a custom weighted probabilistic scoring model (0–100%) processing over 50+ multidimensional user parameters and equipment profiles to dynamically rank options and eliminate zero-result search friction.
- Architected backend data retrieval pipelines to ingest, clean, and process user metrics in real-time, significantly reducing query latency and improving data accuracy.

WORK EXPERIENCE

Camp STEAM

Jul 2026 – Sep 2026

Technical Specialist

Vancouver, BC

- Managed daily technical operations and led technology-focused programming for groups of 20+ youth, translating complex technical logic and data structures into accessible instructional frameworks.
- Evaluated software and hardware performance, testing and troubleshooting technical equipment to ensure smooth daily operations and minimize operational downtime.

CAMPUS LEADERSHIP & EXTRACURRICULARS

York University Faculty of Science

Sep 2026 – Apr 2027

Student Ambassador

Toronto, ON

- Selected as an official departmental representative to communicate academic program pathways and welcome prospective students during campus showcase events.
- Facilitated interactive Q&A sessions and campus tours, effectively synthesizing and presenting institutional data and resources to large audiences.

York University Ski & Snowboard Club

Oct 2025 – Apr 2026

First-Year Representative

Toronto, ON

- Organized and coordinated large-scale club events, trips, and member activities, managing logistics and communication pipelines.
- Analyzed member engagement metrics and feedback data to optimize future event scheduling and operational efficiency.

SKILLS & TECHNICAL COMPETENCIES

Data & Analytics

Data Modeling, Probabilistic Scoring, Algorithmic Logic, Statistical Analysis, Data Visualization

Languages & Databases

SQL, Python, R (ggplot2, dplyr), TypeScript, Git

Frameworks & Tools

Next.js, Tailwind CSS, Vercel, Excel
